

MY BABY IS DEAF...AND SO WHAT?

Director(s): Clara BOUFFARTIGUE

Writer(s): Clara BOUFFARTIGUE

During the last 6 years in France, early detection of deafness has been implemented in maternity wards, 2 days after the birth of newly born babies.

What happens when deafness is suspected? What kind of support can parents expect? Two families recall their experience, a path full of pitfalls. They met with different problems, but it's been a very trying journey for both: multiple medical appointments, the anxiety they suffer because of a lack of any comforting answers...

At the risk of forgetting what's essential... taking good overall care of one's child and not just to focus on its deafness.
