

AIDS, REASONS FOR HOPE

Director(s): Benoit FINCK

Writer(s): Benoit FINCK

The 1980s were hit hard by the onset of AIDS.
The deaf community has been particularly vulnerable due to a lack of information and a misunderstanding of the meaning of the diagnosis.
Faced with many deaths of loved ones, the deaf have also become involved in the fight against the epidemic. But today they tend to be less engaged.
However, even if there is still no cure for AIDS, by relying on advances in research, perhaps it is possible to imagine a world where it would be eradicated?
